Globe Internet Limited
Bringing the World Closer!

Bringing People Closer.
Making it Possible.

About Us

Globe internet Limited **(GIL)** is a total ICT solution provider leading the way in the field of internet and communication. GIL offers state of art managed Network Services across all verticals on two robust independent gateways with redundancy to each other strategically located in all the major cities in Malawi.

GIL is a one stop shop for end to end IT requirements. With years of experience and a long list of satisfied customers, the company is arguably the leader in the domestic network service market. It has proved its skills to be a Leader in providing fully converged network platform Data, Voice and Video applications supporting Enterprises across all verticals.

Globe Internet has offices in all regions in Malawi and support offices in more than 10 major districts. Our presence in all the three regions allows us to accelerate the delivery of reliable end to-end Maintenance and Support services.

Our Vision

-Is to be the major driving force in Information Communication delivery.

Our Mission

-Is to become the premier IT solutions provider in Sub-Sahara Africa Region. We are dedicated to building long-term relationships with customers through quality of service and prompt customer support.

Corporate Solutions

GIL network consists of two main gateways connecting to Seacom and Essay submarine cables via Zobue, Mozambique and Chipata, Zambia respectively.GIL has also invested in 7.8 M inclined satellite orbit for VSAT back up.

GIL Fibre delivers an unparalleled internet experience to businesses looking for an uncapped and unshaped solution with speeds of up to STM 1(155Mbps). Ideal for businesses looking for a superior, effective, convenient and fast Internet solution.

GIL fibre network suffers from no congestion, resulting in superior speeds and low latencies. It is also unaffected by copper theft which all too frequently leaves your business stranded without connectivity for days on end – severely impacting your ability to trade, lowering productivity and putting pressure on your bottom line
